PRODUCT DESCRIPTION

B-Hygienic HygiSeal is a 2 component product for the seamless connection or repair of the FRP sheets, Insupanel et HygiWall (FRP sandwich panels).

INSTALLATION INSTRUCTIONS

- 1) Install the sheets or panels with a joint of ± 4 mm. Make the sheets dust, dirt and grease free.
- 2) Stick the tape 2 mm from the edge of the sheets.
- 3) Remove the cap from the cartridge and place the mixing nozzle. Insert the cartridge into the gun. Spray the first 10 cm away to receive a homogeneous mixture of the product. Apply enough product in the joint.
- 4) +/- 5 Min after applying the HygiSeal, smooth-up the joint with the supplied smooth maker. Make sure the overlap is filled as well. Do not use water or other products for smoothing: this can lead to bubbles.
- 5) Remove the tape +/- 5 min after applying the HygiSeal. Replace the mixing nozzle after each break > 10 min. After usage, close the cartridge with the cap. After closing you can store the HygiSeal max. 6 months.
- 6) You now have a perfect seamless joint.
