Single-Zone Refrigerant Monitor

MSA The Safety Company

Precision Monitoring for Low-level Refrigerant Leak Detection for Small to Medium Size Facilities

DESCRIPTION

MSA Bacharach's Single-Zone delivers the best refrigerant leak monitoring available, with industry-leading MDL of 1 ppm for halogenated gases, the fastest sampling frequency and the widest range of refrigerants accurately detected.

The Single-Zone is the ideal tool for early detection of leaks from specific target areas such as chiller rooms and mechanical rooms. The low MDL enables detection of leaks that other instruments can't find, enhances effective refrigerant management and delivers cost savings through reduced refrigerant recharge and enhanced energy efficiency. Communication interfaces are available allowing easy integration into BMS/BAS systems and remote monitoring solutions.

Features	Benefits
1 ppm Minimum Detectable Level	Detects leaks that other instruments can't
Early detection of refrigerant leaks	Mitigate refrigerant loss, protect produce, enhance energy efficiency
Over 50 different refrigerants accurately detected	Select from a wide range of refrigerant calibration to meet project needs
Infrared sensor technology	Accurate, precise measurement unaffected by other gases, temperature or humidity
High performance sampling pump	Fast response times, including extended sample lines
Minimal maintenance and no calibration required	Low cost of ownership
Halogen, CO_2 and NH_3 versions available	Suitable for a variety of refrigerant monitoring applications
